THE VENUE

Palazzo dei Congressi Lugano
Switzerland

DESTINATION LUGANO

Lugano offers a wide and varied range of reasons for wanting to visit. Much of its touristic renown derives from its temperate climate, favoured by the presence of the lake, mild seasons and by a high percentage of bright sunny days. The safeguard of its territory and the beauty of its landscape equally subdivided among mountains, hills and plains guarantee great conditions for staying here in any season of the year: from mountain hiking to swimming in the waters of the lake and swimming pools, to practicing all kinds of sports, from walking excursions to economic and financial activities and shopping.

Lugano and the entire region gravitating around it are therefore open to an “intelligent” kind of tourism, supported by cultural offers, which, by vocation, are part of the character of this land: from museums to the continuous offer of shows and concerts, from historical buildings and rural ones all the way to the modern constructions of new Ticinese architecture, which is now famous the world over.
